

The slightly textured open reflectors are characterised by homogeneous light distribution, although a controlled centre emphasis can be achieved using focussable Pulso G lamps. The light angle

of each open reflector is apparent from its model designation, optical attachments (such as projection attachment) offer a variable coverage angle.

broncolor offers two types of softboxes

The compact Pulsoflex C series and the more extensive Pulsoflex EM range, comprising softboxes with wide projecting rims that help direct the light more precisely and limit spillage. Both models provide almost completely

homogeneous illumination, which in some sizes can be refined even further with intermediate diffusers. Here as well, a centre emphasis can be achieved and accurately controlled by using focussable Pulso G lamps.
